Learn The Warning Signs of a Heart Attack.

Chest discomfort. This can be discomfort in the center of the chest lasting more than a few minutes or it may go away and return. It can feel like pain, pressure, squeezing or fullness.

- Discomfort or pain in the other parts of your upper body, including one or both arms, the back, neck, jaw or stomach.
- Nausea, lightheadedness or indigestion-type symptoms.
- Breaking out in a cold sweat.
- Shortness of breath. This feeling often accompanies chest discomfort, but can occur before the chest discomfort.
- Not all of these signs indicate a heart attack. If you have one or more of them, don’t wait longer than 5 minutes before calling for help.

Pump up your progress in strengthening a heart-friendly diet low in saturated fats and trans fats, at least 30 minutes of exercise daily, a normal weight and no smoking! Keep your blood pressure, cholesterol and blood sugar levels in check. Also, know your family history and discuss your risk factors with your doctor.
