Get a move on Fitness

Being physically active can add years and vitality to your life, so step up your pace! Exercise each day to lower your risk of heart disease, stroke, bone and muscle mass loss, and helps fight off certain cancers. Regular exercise will also keep you energized, help you control your weight, reduce depression, and increase alertness. Your work-out or walk should be for 30-60 minutes daily or even more to lose weight.

Memorial Day

Memorial Day was originally known as Decoration Day because it was a time set aside to honor the Nation’s Civil War dead by decorating their graves. Memorial Day was officially proclaimed on May 5, 1868 by General John Logan, National commander of the Grand Army of the Republic. It was first observed on May 30, 1868, in which 5,000 participants decorated 20,000 graves of Union and Confederate soldiers at Arlington National Cemetery. The first state to officially recognize the holiday was New York in 1873. By 1890, it was recognized by all of the Northern states. Memorial Day is now celebrated in almost every state on the last Monday in May. Several Southern states have an additional, separate day for honoring the Confederate war dead: January 19 in Texas, April 26 in Alabama, Florida, Georgia, and Mississippi, May 10 in South Carolina, and June 3 in Louisiana and Tennessee.
